

South Elementary School

Main Street
Hingham, MA

The 29 acres are part of a recessional moraine and are interesting for the radical relief and contrasting floras. West of the school is Indian Spring, one of the few natural springs in the town. Eight acres of maple swamp on the Cushing Street side were the site of an open millpond shown on 19th Century maps and are an example of the natural succession of shallow ponds. Access is provided from the Elementary School recreational field. Parking is available in the school's overflow lot located at approximately 810 Main Street. Additional access is being considered along the Liberty Pole neighborhood.
